
PLANNING AND ARCHITECTURE FOR BRIGHT COFFEE SHOP
READ THE PROBLEM STATEMENT
DATA COLLECTION
Collect transaction data from the shop's POS system.
Store transaction data in the shop database.
Gather relevant external data.
DATA INGESTION
Move data from the shop database to the data warehouse.
Data warehouse: Databricks.
ETL pipeline: extract data from different sources, transform it into a usable format, and load it into the data warehouse.
DATA PROCESSING
Process data in Databricks using SQL.
Clean, transform, and validate data. Remove errors, duplicates, and incorrect values to improve accuracy.
DATA ANALYSIS
Extract data from Databricks into Excel for analysis.
Create graphs, tables, and charts in Excel.
Explore relationships such as whether store location affects revenue and how sales change over time.
DATA PRESENTATION
Present findings and insights using Canva or PowerPoint.
PROJECT TIMELINE
WEEK 1
Kick-off & Planning
WEEKS 1–2
Data collection and ingestion
WEEKS 2–3
Data processing
WEEKS 4–5
Data analysis and visualization
WEEKS 5–6
Dashboard and final presentation
Deliverables: • cleaned dataset • analysis visuals • insights summary • interactive dashboards
